SUMMARY

MERN Stack Developer trained at Saylani Mass IT Training (SMIT). I have strong knowledge of building full-stack web applications, focusing on clean architecture, secure routing, and responsive frontend designs. I have hands-on practice in state management and secure authentication flows. I have also successfully delivered a real client project during my learning journey. I am now seeking an internship opportunity where I can apply my skills, grow professionally, and contribute to real-world projects

WORK EXPERIENCE

Inventory & System Operator

2021 – 2025

Ssh Telecom (SMC) pvt ltd

- Opened the internal IGMPMS software daily and selected the required mobile models, colors, and shipment templates.
- Scanned mobile IMEI numbers using a barcode reader to update the IGMPMS system records.
- Printed box labels through the IGMPMS software after successfully scanning the devices.
- Verified data on a 3-PC setup to match physical stock with system records before sending it to the warehouse.
